THE TRUSTED EVV SOLUTION FOR PROGRAM PROVIDERS AND FINANCIAL MANAGEMENT SERVICES AGENCIES

Vesta EVV is the #1 Electronic Visit Verification (EVV) vendor in Texas, successfully serving Medicaid Program Providers. With over 254 million historical transactions and half a million transactions each weekday, it's clear why Vesta EVV is the preferred EVV Vendor in Texas. Based on years of experience, Vesta EVV delivers a reliable, easy-to-use and fully compliant EVV solution. Vesta EVV includes the following features:

MEMBER MANAGEMENT
View Member's demographic and EVV information all in one place. Vesta EVV utilizes a process that retrieves and posts Member Medicaid eligibility data from TMHP daily, so Member eligibility is always verified.

AUTHORIZATIONS
Easily manage and identify Member's Payer, Program and Services(s) for all program types. Vesta delivers daily electronic authorization records received from TMHP for fee-for-service programs, alerting Program Providers and FMSAs to any changes or discrepancies.

VISITPLAN
Based on service authorizations, VisitPlan makes it easy for Program Providers to create schedules and assign Service Attendants to Members who are receiving services.

VISITLOG
Each night, Vesta loads the next day's schedule into VisitLog. As Service Attendants and CDS Employees send start and end times to Vesta, that data is reconciled with VisitLog.

VISITVERIFY
Visits that cannot be automatically verified can easily be identified and verified manually with a simple process.

VISIT REPORTS
Vesta provides complete visibility and electronic documentation with comprehensive reporting features. Say goodbye to information lags and documentation gaps.

#1 EVV Vendor in Texas and Highest Rating For a State Contractor (Grade of A)

EASY TO IMPLEMENT

Vesta EVV provides an easy path to EVV implementation with experienced support and training teams to ensure every Program Provider is properly prepared.

SUPERIOR SUPPORT

Vesta EVV provides thorough training and excellent customer support to meet the needs of its users.

For Program Providers and FMSAs searching for a reliable and easy-to-use EVV system that streamlines operations while meeting compliance requirements, look no further than Vesta EVV.

With Vesta, users can:

► Integrate all EVV data into a comprehensive system.
► Improve operations and individual care.
► Receive comprehensive documentation and reports.
► Enjoy a user-friendly interface.
► Access Vesta EVV from anywhere, at anytime.
► Meet all federal and state EVV Compliance Requirements.
► Meet HIPAA Compliance Requirements.
► Interface existing 3rd Party Management System with Vesta EVV.
► Meet all federal and state EVV Compliance Requirements.

Plus, Vesta EVV also offers additional business solutions:

Vesta CDV

Vesta CDV (Consumer Directed Verification) is a <u>free,</u> simple solution for Consumer Directed Services Employers to manage, verify and approve time. It can be used on any smartphone, tablet, or computer. Vesta CDV interfaces with Vesta Web FMSA which provides a real time view of visit information for both users.

Vesta Biller

Vesta Biller, the #1 billing system for Texas Medicaid Program Providers, is optimized to work with Vesta EVV to ensure claim payments on a timely basis.

Vesta® EVV

Fast, Easy and Reliable Methods for Electronic Visit Verification

Vesta EVV offers three dependable, accurate, and user-friendly solutions to verify service delivery and comply with EVV requirements.

SMARTPHONE APP
The Vesta EVV Mobile App makes it quick and easy for Service Attendants and CDS Employees to clock in and out using their own smartphone.

HOME LANDLINE
The Vesta EVV Home Landline Telephone Interactive Voice Response (IVR) system provides a reliable way for Service Attendants and CDS Employees to clock in and out a home landline telephone.

ALTERNATIVE DEVICE
Vesta EVV Alternative Devices are innovative electronic devices that allow Service Attendants and CDS Employees to clock in and out when the Vesta Mobile App or home landline is not available.

Vesta® EVV

Vesta Mobile

INCREASED AUTO-VERIFICATION

Vesta Mobile App users averaged an 82 percent auto-confirm rate in January 2019.

PRECISE TIME & LOCATION

It only records the location where the Service Attendant or CDS Employee clocks in and clocks out. It does not track the user during the visit.

EFFICIENCY

It offers efficient data entry with fewer errors. Service Attendants and CDS Employees may view their schedules before starting their shift.

REMINDERS

Service Attendants and CDS Employees are reminded to clock out of their shift to help them avoid going over scheduled hours.
